AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application;

--1. (Cancelled)

- --2. (Currently Amended) A multichannel acoustic signal reproducing apparatus comprising at least:
 - a portable housing;
 - a center speaker arranged in the portable housing;

left and right speakers separably attached to the portable housing;

recording and reproducing means arranged in the portable housing capable of recording and reproducing a recording medium;

surround decoding means arranged in the portable housing for decoding a multichannel acoustic signal from the recording and reproducing means to produce surround phonic sound;

first switching means arranged in the portable housing for reproducing a <u>first</u> predetermined number of channels of the multichannel acoustic signal <u>from the surround decoding means</u> through the center speaker and the left and right speakers, and <u>second switching means for</u> switching and outputting remaining channels of the multichannel acoustic signal from the surround decoding means; and

control means for controlling the recording and reproducing means, the surround decoding means and the switching means,

wherein channel signals of the remaining channels from the <u>second</u> switching means are supplied to a television receiver having speakers and capable of reproducing the channel signals as surround phonic sound.

--3. (Currently Amended) The multichannel acoustic signal reproducing apparatus according to claim 2, wherein

the channel signals from the $\underline{\text{second}}$ switching means are transmitted to television receiver by a cable consisting of one wire; and

the left, right, and center speakers are used as rear speakers.
